Subject: note from John T.

Good afternoon Penny:

I just wanted to pass along a thought about the possible School Site at the Old County Social Services building on Leesburg Pike. last evening the Seven Corners Task Force was given a presentation by the Office of Transportation on the existing condition of the intersections leading up to and including 7 corners and its pretty dismal--we'll have a lot of work to do to come up with any fixes although I believe there will be some.

My concern is that the number of school busses that will of necessity be driving into and out of that building onto the service drive and on to Rt 7 in the AM and PM peak will make a currently fairly difficult situation much much worse. An office building with automobiles is one thing (they are short and fairly nimble) but adding busses (long cumbersome and slow to turn) into the mix will be really difficult to overcome.

Best,
john
