John

I haven't had an opportunity to review it fully yet, although I see that in the introduction that it did use all 76 units of the now-consolidated development plan on Powell Lane, which is disappointing.

I have good availability tomorrow so let me know what time works for you.

Aaron

Aaron, can you meet tomorrow to discuss the warrent study? we'll probably want to talk to Penny after you and I have a chance to look it over.

Best,
John

All - The traffic study recommends that a signal is not warranted at the intersection of Powell Lane and Columbia Pike. We will have to lean on VDOT in order to get a signal installed.

Soledad,
Attached is the draft signal warrant study for Columbia Pike and Powell Lane. It is not warranted, and we recommend a contribution, per the proffer. Please take a look and let me know if you have any questions, comments, or changes to incorporate before we submit to VDOT for their approval/concurrence of our findings.

RE Signal Warrant Study

Thanks,
Cheryl
