Subject: seven corners Clarification

Hi Bill Again:

Let me clarify one point on the Form Based Plan--A developer can change the numbers of an element say reduce the retail and increase office but the total square footage for that land bay can not be exceeded and the other criteria that I mentioned (total trips, height, bulk, street connections, plan language, & etc) must also be met. And of course the community, Planning Commission, Supervisor must be satisfied.

Best,  
John
