Subject: Fwd: Input on Development of 7 Corners

Hello- thank you for your efforts to update the 7 corners area.

Many buildings have become old, worn, and weathered and reflect poorly on our neighboring community. At your meeting tonight, I'd appreciate you seriously evaluating how/if you can smartly add any more density and traffic to an already congested and challenged area? There is a solid pedestrian and biking community which I see unable to ride and walk safely without sidewalks and bike paths. Current pedestrian and vehicular traffic isn't efficiently designed or supported well. So many cars go racing down Juniper Lane to cut through and avoid the 7 corners intersection.

I have a 2 year old boy and a 3month old little girl. Our neighborhood has transitioned to have young families again. There are 8 children in a 4 house radius of my house. I walk my 2 children very cautiously down Juniper Lane and our streets just don't feel safe. I've seen many cars illegal pass slower vehicles speeding down our residential street. Our current situation is already so dangerous. If you'd like to verify or see for yourself, you are welcome to watch from our front porch or driveway :) There also isn't any space in our schools either.

Please do not give us more headache, heartache, and hospital visits by adding 800 more residents at the Sears building area!
Thank you for keeping our safety and well being in mind~ Pamela Cerritelli 3119 Juniper Lane
